Book Position

Black Halo is a dark shonen / occult action story where angels are state infrastructure, devils are suppressed humanity, and the protagonist's existence proves holiness is not granted from above.

The first-final draft uses the strongest material from the IP notes rather than the empty manga doc: Zane Hale, Lucifer, Sanctum Light, Cinder, a theocratic surveillance state, and found-family stabilization.

Manga Pilot Draft

Chapter 1 - Subject ZH-01Draft direction: Zane Hale is identified after a forbidden power event.Representative prose:The city cameras called it a medical emergency until the halo appeared. Then every streetlight turned white, every public screen cut to prayer protocol, and Zane Hale learned the state had a name for boys like him before boys like him were supposed to exist.

Chapter 2 - Sanctum LightDraft direction: The angelic regime presents itself as safety while policing narrative.Representative prose:Sanctum officers did not kick down doors. They descended. White coats, gold masks, voices soft as hymns. They were beautiful in the way machinery is beautiful when it has never been asked to care.

Chapter 3 - Lucifer in the DarkDraft direction: Lucifer appears as calm, ancient, and dangerous, but not the simple villain Zane expects.Representative prose:'If I wanted control,' Lucifer said, 'you would not be asking questions.' Around Zane, fragments of a black halo drifted like broken glass deciding whether to become a crown.

Chapter 4 - The WitchDraft direction: A tactical witch saves Zane and explains that magic is relationship, not hierarchy.Representative prose:She drew a sigil on the pavement with two fingers and a curse word. The angel's light bent around it. 'Run if you want,' she told Zane, 'but the regime already wrote your ending. I prefer edits.'

Chapter 5 - Angel-BloodDraft direction: A controlled weapon of the regime becomes Zane's mirror.Representative prose:The angel-blood did not blink when ordered to strike. That frightened Zane more than rage would have. Rage meant a person was still inside somewhere, fighting the shape they had been given.

Chapter 6 - Contract FeverDraft direction: Cinder destabilizes when Zane isolates and stabilizes when he lets people see him.Representative prose:The devil power did not grow when he hated himself. It grew wild. It tore at the body like shame with teeth. Only when someone said his name without fear did the black fire settle into form.

Chapter 7 - Halo LockDraft direction: The squad discovers cooperative combat: witch sigil, angel-blood containment, Zane's infernal surge.Representative prose:For one impossible second, black, red, and white aligned. The regime called that combination corruption. Zane felt it become balance.

Chapter 8 - Heaven Lied FirstDraft direction: The pilot ends with public exposure and a wider war of narrative.Representative prose:The broadcast meant to condemn him caught the wrong angle: Zane shielding a child while angels fired into the crowd. By morning, the city had a new forbidden question. What if the monster was not the one they named?
