Avery Industries LLC

Ethical AI operating company for creator services, accessibility software, rights-aware automation, and sustainable compute.

The Problem

Artists, musicians, developers, creators, and disabled users need AI that helps without exploiting their work, rights, energy, or attention.

The Company

Avery Industries combines service revenue, Ethical AI operations, accessibility products, media, publishing, music, and community impact under one operating system.

Revenue First

Creator Logistics is the first cash engine: editing, short-form clipping, upload prep, creator operations, and content workflow support.

Ethical AI by Design

ATLAS is built around founder-created, company-owned, licensed, or approved materials; asset-rights tracking; and human approval gates.

ATLAS Operating System

ATLAS coordinates agents, tasks, approvals, memory, reports, leads, decisions, rights checks, and company knowledge.

Portfolio Breadth

Avery Industries includes ATLAS HQ, Creator Logistics, AveryTech, Studio ColeTrain, Avery Media Network, Avery Publishing, Avery Music Group, and future collectibles.

Media Priority

Editor ColeTrain, Atlas Protocol, The New Prometheus, and Creator Logistics are the highest-priority channels because they support cash flow, trust, and product credibility.

Sustainable Compute

The long-term infrastructure plan favors solar-backed capacity, cooling innovation, workload efficiency, edge processing, and affordable home data-center appliances.

Current Build Assets

Charter, Master Task Board, Daily Executive Report, Agent Registry, Approval Queue, Shared Memory, Idea Vault, and 300+ backend modules.

Milestones

30 days: offer and leads. 90 days: clients and editor bench. 180 days: ATLAS MVP and accessibility prototype plan.

Governance

Cole retains final approval. ATLAS drafts and recommends but cannot spend, contact, publish, hire, submit, or sign without approval.
